## Mithril Corrosion Control Products

### Coupon Holders

---

The most common method for measuring internal corrosion is through the use of corrosion coupons, which is crucial for establishing a monitoring baseline. The strip coupon holder, the prevalent configuration for coupon holders, enables the installation of strip coupons either individually or as a pair, and they can be positioned at the top, middle, or bottom of the line, or within liquid trap assemblies for monitoring purposes.

#### Features:

- **Manufactured from 316 Stainless Steel**
- **One-Piece construction**
- **Adjustments to dimensions are available upon request**
